What's more, many of its capabilities can be run directly from the start menu, so you can quickly and easily make the changes needed without having to launch the program. Key Features: - Automatically scans, fixes, and eliminates unnecessary files and programs - Allows you to run maintenance and improvement operations while you work or play - Includes a compatible license key to run free for a month - Can be run from the start menu - Allows you to conduct system monitoring, benchmarking, hardware analysis, and software optimization What's New: v1.2.1: - Fixed issues that could happen when using certain games v1.2: - Uses Microsoft LogonUI now for better usability and logging in a more simplified fashion. v1.1.1: - Fixed a problem where some users were unable to receive 100% in LogonUI benchmarks v1.1: - Added support for Windows 8.1 - Fixed some design elements - Added the option to run benchmarks whenever you want - Fixed a problem that prevented some users from disabling automatic updates - Fixed a problem that could happen when using some types of games - Fixed a problem that made the self-update function crash - Fixed a problem that could cause an extended delay in the process of updating - Fixed a problem with the Windows Version Code in the About box v1.0.1: - Fixed a problem that could make some users receive a warning during installation - Fixed some localized strings What's new in this version: v1.3.1: - Fixed a problem with benchmarking results that could show different results compared to real-world performance - Fixed a problem with benchmarking results showing a low and a high value - Fixed a problem with benchmarking results that only appeared when using certain games - Fixed a problem where some users could not run WinOptimizer because of conflicts with other programs - Fixed a bug that could cause low throughput when launching the tuning tool - Fixed a bug that could show an incorrect error message when installing WinOptimizer on a computer with certain hardware - Fixed a problem that could lead to an error message after uninstalling WinOptimizer v1.3:

### What's New in the?

Ashampoo WinOptimizer is meant to maintain your machine in good condition. The program can automatically clean the computer and do a database update, giving it a great boost. If you want to, you can scan for errors in your computer or install a benchmark tool. If you've never used a cleaning program before, you can do a test analysis for free. Shampoo WinOptimizer has been thoroughly tested and includes many features to allow you to clean up your machine. Great news for Mac users: Shampoo WinOptimizer also supports them, so you can easily make use of its many functions, even if you work exclusively on a Mac. Removing the Reminders Password If you forgot your Reminders password then here is the solution for that as well. Reminders Password - Remove The Password Password Reminders App does not require you to remember a password and that makes it easy to use. It can be used on multiple Apple devices and works across apps and various services. It is so helpful in case you need to remind yourself of any important event in the future. Due to this reason it is so easy that you can use it anytime anywhere. There is no need of remembering the password and that is the main reason why it is also known as the 'password manager.' In this blog, we will show you how you can reset the password for 'Reminders' in OS X El Capitan. Before you start the process you need to download the 'Password Reminders' from the official Apple app store. On the next step, open the app and enter your Apple ID and password. The Reminders screen will appear as shown below. [2/11/2018 1:24:21 PM] After this process is completed you will be able to use the app anytime you want. Your Password Will Be Forgotten If you want to reset the password you need to remove the password for your iCloud account. All the information regarding the latest iCloud features is available on our website and you can use the same. We will keep updating this post with the latest feature as well. If you have forgotten the password for your iCloud Account then there are two ways to proceed. One is using 'iCloud Password Finder' on the other is by using 'iCloud Settings.' If you have used both of these methods to find the password, you should be able to reset it. All you need to do is to follow the steps which are mentioned below. 1. From iCloud, open the settings
