## AutoCAD

Get the path of your Autocad App installation. Copy the autocad app path from step 1 to the “Options > Preferences > System > Support > Addons “ field Enter the below autocad app path: (“C:\Program Files (x86)\Autodesk\AutoCAD 2015\Addons”) You can run AutoCAD by using the following path: “C:\Program Files (x86)\Autodesk\AutoCAD 2015\Autocad.exe”

Troubleshooting Sometimes the Autocad App will run but the Menu won’t open. This can be solved by restarting your computer. Sometimes Autocad will start with no graphics but will produce an error message. To get rid of the error message delete the “manage\_slides\_tab.xml” file that is in your “C:\Program Files (x86)\Autodesk\AutoCAD 2015\Assets\bin” folder.

Photoreceptor death has been implicated in age-related macular degeneration (AMD). A small group of patients respond to an approved therapy, ranibizumab, administered intravitreally (IV). We postulate that ranibizumab works at the level of receptors on the outer segment plasma membrane, where it neutralizes the effects of VEGF-A, a potent survival factor for photoreceptors, and thereby induces photoreceptor death and causes disease progression. The goal of this proposal is to test that hypothesis, by examining the effects of ranibizumab on photoreceptors and the mechanisms underlying its effects. We will use an animal model that mirrors some key aspects of AMD, namely, that it has a relatively slow course and high prevalence among the elderly. Furthermore, a unique advantage of this model is the available genetic tools and the opportunity to perform genetic studies. To avoid redundancy, an additional animal model will be included in the proposed experiments, as appropriate. [unreadable] [unreadable] This proposal combines three interrelated lines of study, which are justified by results obtained in the previous grant period, as well as by the potential synergy between the lines of work. The first line of study will examine the extent of ERG changes that occur in a mouse model of AMD as a function of ranibizumab treatment. The second line of study will
