Crono

Crono Crack Mac is a graphical digital analogical chronometer for racing simulators. It displays a track, menus at the top and a gap between them. Features: - A whole track section can be zoomed, panned and clipped - You can set the slider wheel to go from 0 to 100% of the simulated lap distance - You can zoom in/out at any time with the mouse wheel - You can pan the track and display the entire lane - You can set the slider wheel to go from 0 to 100% of the simulated lap distance - You can zoom in/out at any time with the mouse wheel - You can pan the track with the slider wheel - You can add and remove lanes and sections with the mouse-click This is only a quick-start that shows you how to create a chrono application based on an existing C# Form with a Shell that shows the menu. It uses the following Addins: WxApp: Version-Info: major: 5 minor: 1 revision: 0 status: Approved priv: None GitHub (required): owner: Kagami repo: WxApp branch: v5 Install: - Create a new git repository and add the WxApp addin as a dependency - Enter info to the configuration file: - repo, owner and repo are the same as in the WxApp addin - branch= is the branch that you want to work with - Add a new Form to the project - Add a new Shell (see below) to the Form - Add a new Canvas to the Shell. Here you draw a track that you can zoom in and out with the slider bar at the top. Also on the top you draw a slider that can go from 0 to 100% of the simulated race distance. - You can add as many sections as you want that can be clipped as you like. You also have the option to add as many lanes as you like. In our example we have one lane.

Crono

Crono is a digital analogical chronometer, which shows the time of a vehicle running along an F1-circuit. It can be reached via the Crono menu at the top or by pressing E. The first version of Crono was released in a form of a basic game, which could be played by one single person. We'd like to continue improving the number of advanced configurations, adding more features and by creating new interesting parts of the program. Download CRONO now! ===== Piece of Cake Crono is one of the largest and most complex programs I've ever written. Crono is highly addictive, since it mixes the two most difficult of all disciplines to synchronize: Programming and Time Keeping. Multiplayer Mode To play Crono you need two computers. They must both be configured the same way. That is: - After installation, all gamers should re-start with their computers (or reset their computer to a fresh default factory state). - Crono must be launched with the -multiplayer flag to be able to detect the other gamers. - The other members are from the same group, since you can't play in the same group as the other members of your group. Group: m e p a r t e 1 1 a m a h u g e o n Location: Australia User ID: 1 Password: 1 - Crono can work with 2 or more players, but I've never tried that. Random Environment - The game never stops for more than 20 seconds. - The game environment is random, but the same game environment is used throughout. - The game environment is seperated into two areas: "outside" and "inside". The outside area can be seen in all directions (in azimuth and elevation). The inside area is invisible (and non detectable). - The outside area is based on a real circuit at the Estoril Grand Prix. - The inside area is based on a real circuit at the Valencia Grand Prix. - It is not possible to pass outside the track boundaries. - There is no fog in the outside area. - The outside area is made out of real world elements: grass, walls, trees, cars, the track and spectators. - The inside area is made up of virtual objects. The track, the cars, the spectators and the walls have been put into the game environment in various sizes, shapes 09e8f5149f

System Requirements For Crono:

Minimum Requirements: OS: Windows 10, Windows 8/8.1, Windows 7 SP1, Windows Server 2016 CPU: i3 or faster RAM: 1 GB or more HDD: 30 GB free space 1366 x 768 screen resolution Microsoft Silverlight is required to play online games or watch the video tutorials. Recommended Requirements: CPU: i5 or faster 1920 x 1080 screen resolution Windows 10
