System Requirements:

The purpose of this project is to create a VOCalesound for Houdini with only very basic resources. I am having a lot of trouble with the Vocalizer plugin, so, I thought it would be good to get a basic version of it working. It appears to be able to handle just about any source format you throw at it, however, it is still very slow and not very robust. The vocalizer can easily take up to 10 minutes to process a few short audio clips. If you don't know the basics, or think this sounds good and you
