He has a mouth that thinks faster than any person on the planet and wants to make sure you know it! He can improvise, and turn anything into a tool, or weapon of sorts that will help you out in the most unusual, interesting or sometimes terrible situations.0 History. If you like the idea of a camera that can be 'just another tool' in your photographic toolbox, but don't want to spend too much, then Fujifilm's FinePix XP20 is a strong contender. It is a svelte, compact, pocketable camera that works with Fujifilm's finepix experience - this could well be the first camera Fuji has designed for everyday use. This new camera has been designed to fit perfectly into the palm of your hand. Weighing in at 110g it is 26% lighter than the competition. Its small format means it won't even fill up your glove compartment. It also has its own slot in the camera bag, providing protection for it. The camera has a host of high end features - the same as its bigger brothers, but packed into a much smaller and more easily carried package. It's got a sensitivity of ISO 100-3200. That's an impressive range, and will enable you to shoot in dimly lit conditions. In addition to that there's a host of finepix experience options, including the automatic phase detection and face detection. As well as that, it also features the following three user-selectable scene modes: Scene Auto (23), Portrait (11) and Landscape (21). All in all, it's a highly competent camera with a lot to offer. Display This Fujifilm XP20 is available with a Live View screen, or in the classic optical viewfinder. The Live View screen has a 3-inch resolution VGA LCD display. The VGA display can be operated in about 10 different display modes, including the standard and several different alternate modes. On the rear, there is a 2.5inch TFT display that can display menu information. Pictures or video, can be displayed on this screen by tapping the screen. Image sensor The camera comes with a 12.1-megapixel sensor. As well as this the camera features 4 different shooting modes, which are as follows: Intelligent Auto, Program AE, Aperture Priority AE and Shutter Priority AE It's important to bear in mind that this sensor is capable of capturing pictures at three different sensitivity settings, between ISO 100-3200. The maximum shutter speed that the camera is capable of is 1/4000th. Connectivity
