The availability of a pirated copy varies by country, but some of the more popular countries are China, Ukraine, the USA, Russia, India, Korea, Iran, Syria, and Saudi Arabia. There are various reasons why counterfeit AutoCAD copies are offered for sale on these websites, including because a company may not have any copies of AutoCAD available or because they are unable to pay the license fees. If you encounter a website that offers genuine copies of AutoCAD, but the license is not valid, the transaction should be carefully checked. If the license is
