Hear what students are saying about us.People are blaming India's dysfunctional financial system, a few bad apples, lack of governance and a weak leadership for the country's economic mess. We have heard the latest: The finance ministry's plan for some structural reforms in the banking system, including, the poor implementation of the Basel 3 norms for capital adequacy and the stalling of interest rates that have been raised in recent months. Can the Indian economy recover from the latest crisis? We can tell you this much: The Indian economy is not going to recover unless our leaders are willing to take some hard decisions, while those in power continue to make disastrous decisions. For starters, India should seek help from the International Monetary Fund (IMF) on this one. Now, we must wait for the results of the IMF review of India's economic situation (which has been going on for some time now). Based on this,

It does this by drawing from theories of diversification, causal discovery, and Bayesian Networks. The eCDM simultaneously provides: (i) the causal explanation of diversification, (ii) a principled framework for studying diversification strategies and behavioral finance, and (iii) a causal explanation of the correlation between diversification and risk. SchemePortfolio diversification is an important topic of research because it is broadly believed to reduce risk. However, its behavioral origins and empirical links to risk are unclear. We propose a generalizable causal framework for diversification that provides a principled explanation of the empirical link between diversification and risk. Within this framework, diversification can be understood as a causal process in which the diversified portfolio systematically benefits from divers
