

[Download](#)

Simply drag and drop files from your DAW or file system, then change your samples into something completely new and unique with loops, crossfades, pitch and reverse...or all of it! With this package, you can set up instruments such as a MIDI keyboard with just a few clicks! Plus, you can add modulation and reverb effects to your songs, creating amazing sound effects! You can also add audio effects to your songs, which will allow you to create more varied and unique sound effects. This tool is available to even the most demanding producers and songwriters.
