[Download](#)

We've spent hours trying to set the record for the longest railgun shot in a video game, and we've gotten pretty good at it. It turns out that you, the player, are better at this than we are, as the longest shot in our record-setting video was only about a second, and yours can easily hit a target a mile away. That's right. They're just as good as us. You too! This game uses a modified version of the classic Desert of the Dead engine, so even if you haven't played that game before you can get right into the action. You can choose your difficulty and a bunch of options to make it a challenge, or you can use the easy mode. The game is playable in portrait or landscape mode and there are 3D graphics (not 3DOBJ) so you can see the shapes and contours of the 3D models from any angle you want. There are over 10 unique weapons to choose from, along with 10 unique special abilities. We also made a bunch of achievements and trophies for you to earn. Here's what you can expect from Desert of the Dead: 3D graphics, instead of 3DOBJ Variable difficulty that supports easy mode and a few others. Play in portrait or landscape mode. 3D sounds and music. Local cooperative multiplayer. Vocoder Instructions and Controls: A - Accelerate. - Accelerate. E - Energy. - Energy. S - Secondary Fire. - Secondary Fire. R - Reload. - Reload. V - Secondary Fire. - Secondary Fire. W - Weapon Swap. - Weapon Swap. I - Infusion. - Infusion. Jump - Jump. - Jump. C - Build. - Build. A - Aim. - Aim. Q - Quit. - Quit. Z - Zoom In. - Zoom In. E - Escape. In addition to those primary weapons, we've given you a selection of specialty weapons like the flamethrower, rocket launcher, grenade launcher and minigun, all of which have their own special abilities that you can use to help give yourself an edge on the undead. Controls: Left click - Aim and fire.
