To analyze the relationship between changes in mitral valve plasmimetry (leaflet area variation with flow) and mitral and aortic pressures and electrical activity, we studied 85 patients. An ultrasonic flow probe was located on the mitral valve, combined with a pulmonary artery catheter, and an 8-site aortic micromanometer. All the studied variables were directly evaluated by the patient, during a spontaneous physical activity. The overall leaflet area variation, obtained using a moving average, correlated directly and inversely to E-max (peak of electrical activity of ventricular muscle

This association existed throughout the entire range of flow and was independent of age, body surface area, and left ventricular function. The relative variation in leaflet area was also inversely related to E-max (P = .011), but was related directly and independently with diastolic pressure (

Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between. at the same time, it's a very "solid" and enjoyable game. I recommend it to anyone who wants a nice RPG action experience. It's a sequel to AN EMPTY WORLD, and comes with improvements in many aspects including the graphics. The sound is also very nice.
