Nonpenetrating high-speed rotary ablation of small peripheral lung lesions is an effective, safe, and easily performed minimally invasive method. The purpose of this study was to report our experience with the device and to assess the effectiveness of this technique as a first line treatment. From January 1991 to May 2011, 2443 patients were treated with the Rotablator system at our institution, which contained three different Rotablators: Single Rotablator, Double Rotablator, and Rotablator Pulse. A total of 695 lesions were treated, which include 231 lesions less than 3 cm in diameter, of whom 157 were malignant and 74 were benign. In the 2725 lesions of size 3 to 5 cm in diameter, the success rate was 92%. The mean age of patients with pulmonary lesions 3 to 5 cm in

"Yes, we always evaluate different drivers," said Mercedes team boss Toto Wolff on the subject of Hamilton's replacement. "I can only comment that we are not evaluating Nico Rosberg. We are evaluating different drivers. "Lewis is our principal driver next year. But we are always open-minded to other drivers, which is in our programme and can be no secret." Wolff confirmed that Hamilton's confirmation

Romney: 'Unthinkable and unacceptable' to not commit to peaceful transition of power Two Louisville police officers shot amid Breonna Taylor grand jury protests MORE on Thursday called for the controversial CIA-run prison in Guantanamo Bay, Cuba, to be reopened. "Guantanamo Bay must be opened, it is far past time," Trump tweeted. "The Camp was built & is functioning well. There is no reason for it to be there. Will be closing soon." Trump's tweet came shortly after a major op-ed in The New York Times, which said Trump's military leaders are trying to ensure that the U.S. maintains the option to send terrorists captured in the battlefield to the island prison. ADVERTISEMENT The op-ed, written by Anthony Shaffer, a former Central Intelligence Agency official who worked at the prison, questioned why the U.
